INSTRUCTION GUIDE

Twist-Lock Light Control HS565
Congratulations on a wise purchase!

INSTALLATION

For the installed light fixture that will be controlled by this light control, **disconnect the AC electrical power at the fuse or breaker box.**

1. Remove old light control by turning counter clockwise until it stops. Then pull up on light control.
2. Align prongs on light control with those on receptacle. Push down on light control and twist clockwise until it stops.
3. Restore AC electrical power to the light fixture.

Make sure that the photocell window on the light control is not pointed towards any artificial or reflected light sources. This will cause false operation of the light fixture.

Note: The light control has a time delay and will take several minutes to turn off when first installed. To test operation, cover the photocell "eye". The light control will take up to two minutes to operate.

Sunlight operation only.

SPECIFICATIONS

Rating: 120V AC, 60 Hz

TROUBLESHOOTING

PROBLEM: Light stays on during daytime.

SUGGESTION: Make sure that the photocell is receiving direct natural light.

PROBLEM: Light not on at night.

SUGGESTION: The photocell may be receiving artificial light. Adjust position of light control or shield artificial light from striking the photocell.

PROBLEM: Light blinks or cycles on and off at night.

SUGGESTION: Light is being reflected into the lighting control. Reposition the light control.

LIMITED WARRANTY

The product you have purchased is guaranteed against defects in workmanship and materials for the period stated on the package. Warranties implied by law are subject to the same time period

limitation. Some states do not allow limitations on how long an implied warranty lasts, so this time limitation may not apply to you.

If the product fails due to a manufacturing defect during normal use, return the product and dated sales receipt to the store where purchased for replacement OR send the product and the dated sales receipt to:
